LIMITED EDITION

ZEPHYR 155ST

CHASING PERFECTION

Since 1986, Wilderness Systems has chased perfection in the kayaks we design and build. Our obsession for better performance, finer materials and unmatched comfort continues to produce kayaks that are widely acclaimed to deliver the most satisfying paddling experience in the industry. This passion and commitment has been brought to new heights in the 2009 Zephyr 155 ST Limited Edition—a kayak that combines advanced materials and engineering with breathtaking beauty and meticulous craftsmanship.

In a unique lay up of fiberglass, carbon and Kevlar fiber infused with vinylester resin, this superb sea kayak offers high performance, great maneuverability, incredible responsiveness and feel. And at only 39 pounds, it is truly a great design and engineering achievement that delivers this

extremely light weight without any compromise to strength, impact resistance or durability.

Although engineered to satisfy those who demand the highest in performance, the Zephyr 155 ST is also hand-crafted for those who appreciate the fluid, sophisticated styling, attention to design details, and appreciate the flat-out sexy appeal of the carbon fiber/Kevlar aesthetic.

Beyond the limited edition allure and eye-catching looks, the Zephyr 155 ST—like all Wilderness Systems Zephyrs—is engineered for maneuverability, responsiveness, and sea-worthy tracking. The beam and flare of the moderately soft-chined hull gives the Zephyr outstanding stability on edge to create a playful yet balanced kayak that excels in rougher conditions. The rigidity of the

carbon fiber translates into an incredibly efficient transfer of energy from each paddle stroke and the ultra light weight means getting up to speed more rapidly and maintaining speed with less effort.

However, while perfect for navigating ocean rock gardens or coast surfing, this sporty sea kayak is not just for the sea. Premium outfitting and the comfortably sized cockpit offer the level of comfort demanded for longer trips. Deck features such as water-tight hatches and bulkheads make the Zephyr 155 ST ready to handle expeditions and extended camping trips in lakes and rivers.

From day trips cruising the coast to paddling for a weekend get away, the Zephyr 155 ST Limited Edition is truly the ultimate in performance and comfort, in form and function.

OUTFITTING & DESIGN DETAILS

- Dynamic flame surfacing with chrome-plated, flush-fit deck fittings and specially coordinated silver deck lines.
- Phase 3XP Seat System: Unprecedented fit and comfort, precision adjustment settings including ergonomically designed high density foam seat with better air circulation; patented height adjustable leg support and backband; easily accessible controls for repositioning on the fly.
- Adjustable, molded thighbrace and hip padding for enhanced control.
- New Domed Hatch Covers: Improved fit, easier access, easy-on/off, and water-tight seal.
- Bow and stern carbon fiber bulkheads.
- New Soft Touch Handle: Ergonomically designed for more comfort and better grip.

CONSTRUCTION

- Vinylester Resin: Added impact resistance.
- Carbon/Kevlar Fabric: Delivering both stiffness and durability, this performance oriented "toughness" fiber provides impact and puncture resistance.
- Carbon Unidirectional Fabric: Brings added stiffness in one specific axis.
- Carbon Fabric: Provides stiffness in multiple directions.
- Fiberglass Surface Layer: Provides abrasion resistance and protects the carbon and carbon/Kevlar fabrics from wear and abrasion.
- Clear Gel Coat: Seals and adds luster to the finish.

LIMITED EDITION

Individually Numbered, Handcrafted Series of 50 Issued Worldwide. Available February 2009.

"Our brands have been built on a commitment to design, research and development and I think we continue to have the best design, engineering and production teams in the industry. With the concept boats, we wanted to demonstrate our leadership as both designers and master craftsman. The project gave our team the opportunity to explore their potential, utilizing state of the art materials and design. The goal was lighter weight and higher performance, which is why they explored carbon and carbon/Kevlar. But we also wanted a special touch of sophistication to make these boats especially alluring. The result was truly special, handcrafted, limited edition masterpieces that married the technology and the art form of kayak production." –Sue Rechner, CEO
